DGA - Distributed Graph Algorithms

Supervisor: Prof. Jukka Suomela

Contact information: jukka.suomela@aalto.fi

Job description: Our research group designs and analyses very fast distributed and parallel algorithms. You will take part in our ongoing research related to the theory of distributed graph algorithms. You do not need to have prior knowledge of distributed computing, but you are expected to have a good understanding of algorithms, data structures, models of computing, and graph theory. For more information on our research, see http://research.ics.aalto.fi/da/
