**MDA - Metagenomic Data Analysis**

**Supervisor:** Prof. Juho Rousu

**Contact information:** By email: juho.rousu@aalto.fi

**Job description:** The intern will participate in the development of new data analysis methods for metagenomic data, arising from different environments including deep biosphere, and human gut microbiome and the food production chain. The job will entail implementation of algorithms, experimental evaluation as well as analysis and interpretation of the data with biological experts.
