OCT - Online Courseware for Theoretical Computer Science

Supervisor: Dr. Tommi Junnttila / Dr. Tomi Janhunen

Contact information: tommi.junnttila@aalto.fi tomi.janhunen@aalto.fi

Job description: In Spring 2015, our department will offer a new course "ICS-C2000 Theoretical Computer Science" that substitutes and extends the course "T-79.1001 Introduction to Theoretical Computer Science". This summer project will contribute to development of online courseware (exercises and their automatic grading systems) for the course. If you have excellent programming skills and passion for challenging algorithms (and possibly fluent skills in web programming as well), this is a project for you.
